Bulletin of the Seismological Station

IVIGTUT

 $\varphi = 61^{\circ}12' \text{ N.}$ $\lambda = 48^{\circ}11' \text{ W.}$ $h = 20 \text{ m.}$

Lithologic Foundation: Gneiss.

Instruments: WIECHERT 1000 kg. horizontal seismograph.
 WIECHERT 1300 kg. vertical seismograph.

Constants:

Component	T	v	r	v
N	sec.		mm	
E	8.7	3.6	0.1	180
Z	8.8	3.8	0.5	215
	4.9	3.1	0.1	190

The United States Coast and Geodetic Survey aided in the maintenance of the station during the German occupation of Denmark and published the readings of the records for December 1939 and for 1940, 1942 and 1943. For 1941 the time-corrections were not available. They have now been computed from observations, but these were not taken daily, and there is an uncertainty of about 1 sec. in many of the corrections applied. For Jan. 20 and 21, and for February 9. the uncertainty is greater.
