

SEISMOLOGICAL BULLETIN 1912.

BATAVIA OBSERVATORY, JAVA.

AUG 3-1912

PREFACE.

The astatic Seismograph of WIECHERT of 1000 K.G. has been registering regularly since December 6th 1908. The results are published from the beginning of 1909 (the Messina earthquake included) in a monthly bulletin.

The instrument is mounted on a heavy brick pillar in a room with thick walls (about 70 centimeters) which is protected against the sun's heat by open galleries around it. The components are placed in E.-W. and N.-S. direction respectively.

The pins are lifted electrically every hour for a period of 10 seconds by the Javanese observer on duty. A lifting of two seconds every minute is given by an electrical clock of PEYER FAVARGER by means of the second-dial passing every minute through a drop of mercury.

For each month are applied the mean constants for that month. T_0 and E , the oscillation period and the coefficient of damping, are determined every week. V , the magnification for very short waves, is determined occasionally only. It is found by direct measurement by giving the pendulum a displacement by means of the horizontal adjusting screws, of which the value can be determined easily from the pitch (a) and the angle of displacement of the screws and the height of the screws (b) and of the centre of gravity (c) above the Cardanic suspension apparatus.

It was found:

(a) = 1.407 millimeters.

(b) = 1225 "

(c) = 895 "

The constants used in last year are given below.

1911.	E.-W. component.			N.-S. component.		
	V.	T_0 .	E.	V.	T_0 .	E.
January	284	9.1	4.7	186	8.9	4.4
February	"	9.1 ⁵	4.4	"	8.9	4.9
March	"	8.7	4.2	"	8.6	4.6
April	"	8.9	4.3	"	8.7	4.4
May	214	9.0	4.4	"	8.8	5.0
June	"	9.0 ⁵	4.8	"	9.0	4.6
July	217	7.9	6.0	"	8.8	4.4
August	"	7.9	3.1	"	8.3	4.3
September	"	7.5	3.8	"	8.7	4.3
October	"	7.6	4.7	"	9.1	4.7
November	"	7.5	5.0	"	9.1	5.0
December	"	7.5	5.0	"	9.0	5.0

The *notation employed* is that of the Göttingen Geophysical Institute.
The following abbreviations are employed:

CHARACTER OF THE EARTHQUAKE.

I = perceptible; II = moderately strong; III = strong.

d (*terrae motus domesticus*) = local.

v (" " vicinus) = near (less than 1000 K.M.).

r (" " remotus) = distant (1000 to 5000 K.M.).

u (" " ultimus) = very distant (over 5000 K.M.).

PHASES.

P (*undae primae*) = 1st preliminary tremors.

S (" secundae) = 2nd

" "

L (" longae) = principal phase, long waves.

M (" maxima) = maximum amplitude.

C (*coda*) = prominent waves among the after tremors.

F (*finis*) = end of perceptible movement.

PR₁, PR₂, SR₁, SR₂, = 1st, 2nd reflected waves of P and S.

PS = Waves changed by reflection from longitudinal to transversal oscillation.

WAVE-ELEMENTS, UNITS.

T = Complete Period in seconds.

A = Amplitude, measured from median position in microns.

A_E = E.-W. component of A.

A_N = N.-S.

" "

i (*impetus*) = abrupt commencement, clearly defined.

e (*emersio*) = gradual " , not clearly defined.
