1968

PRELIMINARY SEISMOLOGICAL BULLETIN
 from January 1, to March 31, 1968

Station: Ljubljana (LJU) - Coordinates: $46^{\circ} 02.6' N$ Lat.
 $14^{\circ} 32.0' E$ Long.
 Geocentric direction cosines: $a = +6743$, $b = +1748$, $c = +7175$
 $d = -8$, $h = -4$
 Height above mean sea level: 396 m;
 Lithologic fundation: sandstone (carbon);

Instruments:

Wiechert; horizontal astatic seismograph, $M = 200$ kg, mechanical
 registration, 16-18 mm/min.

Constants (31.1.1966):

Component	T_0	v_1	r/T_0^2	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vertical component Z with galvanometrical re-
 cording; $T_0 = 1.5$ sec, $T_g = 1.5$ sec; $D_1 = D_2 = 1$, $V_{max} = 10150x$,
 registration velocity: 60 mm/min.

Note: Periods of seismic waves are given in seconds, the
 amplitudes in microns; sign + means compression or movement of
 ground towards north or east, sign - means dilatation or movement
 towards south or west. All times are given in GMT. Time signals
 are received one or two times daily and are registered on a chro-
 nograph. Wherever possible time readings up to one tenth of a
 second are given. Macroseismic data refer to Mercalli-Cancani-
 Sieberg scale (MCS), macroseismic rays are given in kilometers.
 Abbreviation DECM means: Determination was made by electronic
 computer.

 P.O.B. 01+20, Yugoslavia

1968

PRELIMINARY SEISMOLOGICAL BULLETIN
 from April 1, to June 30, 1968

Station: Ljubljana / LJU / - Coordinates: $46^{\circ} 02.6' N$ Lat.
 $14^{\circ} 32.0' E$ Long.
 Geocentric direction cosines: $a = +6743$, $b = +1748$, $c = +7175$
 $d = - 8$, $h = - 4$
 Height above sea level: 396 m.
 Lithologic fundation: sandstone /carbon/.

Insruments:

Wiechert, horizontal astatic seismograph, $M = 200$ kg, mechanical
 registration, 16-18 mm/min.

Constants / 31.1.1966 /:				
Component	To	v:l	r/T ₀ ²	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vetical component Z with galvanometrical re-
 cording. $T_0 = 1.5$ sec, $T_g = 1.5$ sec, $D_1 = D_2 = 1$, $V_{max} = 10150x$,
 registrtrtion velocity: 60 mm/min.

Note: Periods of seismic waves are given in seconds, the
 amplitudes in microns. Sign + means compression or movement of
 groud towards nordh or east, sign - means dilatation or movement
 towards south or west. All times are given in GMT. Time signals
 are recived one or two times daily and are registered on a chro-
 nograph. Wherever possible time readings up to one tenth of a
 second are given. Macroseismic data refer to Mercalli- Cancani-
 Sieberg scale / MCS /, macroseismic rays are given in kilometers.
 Abbreviation DECM means: Determination Was made by electronic
 computer.

1968

PRELIMINARY SEISMOLOGICAL BULLETIN
From July 1, to September 30, 1968

Station: Ljubljana / LJU / - Coordinates: $46^{\circ} 02.6' N$ Lat.
 $14^{\circ} 32.0' E$ Long.
Geocentric direction cosines: $a = + 6743$, $b = + 1748$, $c = + 7175$
 $d = - 8$, $h = - 4$
Height above sea level: 396 m.
Lithologic fundation: sandstone /carbon/.

Instruments:

Wiechert, horizontal astatic seismograph, M= 200 kg, mechanical registration, 16-18 mm/min.

Constants / 31.1.1966 /:				
Component	To	v:l	r/T ₀ ²	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vertical component Z with galvanometrical recording. To=1.5 sec, Tg=1.5 sec. D1=D2=1, Vmax=10150x,

Note: Periods of seismic waves are given in seconds, the amplitudes in microns. Sign. + means compression or movement of ground towards north or east, sign. - means dilatation or movement of ground towards south or west. All times are given in GMT. Time signals are received one or two times daily and are registered on a chronograph. Wherever possible time readings up to one tenth of a second are given. Macroseismic data refer to Mercalli-Cancani-Sieberg scale / MCS /, macroseismic rays are given in kilometers. Abbreviation DECM means: Determination was made by electronic computer.

1968

PRELIMINARY SEISMOLOGICAL BULLETIN
from July 1, to September 30, 1968

Station: Ljubljana / LJU / - Coordinates: $46^{\circ} 14^{\circ}$ 02.6° N Lat.
 32.0° E Long.
Geocentric direction cosines: $a = + 6743$, $b = + 1748$, $c = + 7175$
 $d = - 8$, $h = - 4$
Height above sea level: 396 m.
Lithologic fundation: sandstone /carbon/.

Instruments:

Wiechert, horizontal astatic seismograph, $M = 200$ kg, mechanical registration, 16-18 mm/min.

Constants / 31.1.1966 /:				
Component	To	v:l	r/T ₀ ²	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vertical component Z with galvanometrical recording. $T_0 = 1.5$ sec, $T_g = 1.5$ sec. $D_1 = D_2 = 1$, $V_{max} = 10150x$,

Note: Periods of seismic waves are given in seconds, the amplitudes in microns. Sign. + means compression or movement of ground towards north or east, sign. - means dilatation or movement of ground towards south or west. All times are given in GMT. Time signals are received one or two times daily and are registered on a chronograph. Wherever possible time readings up to one tenth of a second are given. Macroseismic data refer to Mercalli-Cancani-Sieberg scale / MCS /, macroseismic rays are given in kilometers. Abbreviation DECM means: Determination was made by electronic computer.

P.O.Box 01-20, Yugoslavia

PRELIMINARY SEISMOLOGICAL BULLETIN
from October 1, to December 31, 1968

Station: Ljubljana / LJU / - Coordinates: $46^{\circ} 02.6' N$ Lat.
 $14^{\circ} 32.0' E$ Long.
Geocentric direction cosines: $a = + 6743$, $b = +1748$, $c = + 7175$
 $d = - 8$, $h = - 4$
Height above sea level: 396 m.
Lithologic fundation: sandstone /carbon/.

Instruments:

Wiechert, horizontal astatic seismograph, $M = 200$ km, mechanical registration, 16-18 mm/min.

Constants / 31.1.1966 /:				
Component	To	v:l	r/T_0^2	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vertical component Z with galvanometrical recording. $T_0 = 1.5$ sec, $T_g = 1.5$ sec, $D_1 = D_2 = 1$, $V_{max} = 10150x$,

Note: Periods of seismic waves are given in seconds, the amplitudes in microns. Sign. + means compression or movement of ground towards north or east, sign. - means dilatation or movement of ground south or west. All times are given in GMT. Time signals are received one or two times daily and are registered on a chronograph. Wherever possible time readings up to one tenth of a second are given. Macroseismic data refer to Mercalli-Cancani-Sieberg scale / MCS /. Macroseismic rays are given in kilometers. Abbreviation DECM means: Determination was made by electronic computer.

PRELIMINARY SEISMOLOGICAL BULLETIN
from October 1, to December 31, 1968

Station: Ljubljana / LJU / - Coordinates: $46^{\circ} 02.6' N$ Lat.
 $14^{\circ} 32.0' E$ Long.
Geocentric direction cosines: $a = + 6743$, $b = +1748$, $c = + 7175$
 $d = - 8$, $h = - 4$
Height above sea level: 396 m.
Lithologic fundation: sandstone /carbon/.

Instruments:

Wiechert, horizontal astatic seismograph, $M = 200$ km, mechanical registration, 16-18 mm/min.

Constants / 31.1.1966 /:	To	v:l	r/T_0^2	V
N-S	5.0	2.20	0.0043	69
E-W	4.9	2.37	0.0058	67

Hiller-Stuttgart, vertical component Z with galvanometrical recording. $T_0 = 1.5$ sec, $T_g = 1.5$ sec, $D_1 = D_2 = 1$, $V_{max} = 10150x$,

Note: Periods of seismic waves are given in seconds, the amplitudes in microns. Sign. + means compression or movement of ground towards north or east, sign. - means dilatation or movement of ground south or west. All times are given in GMT. Time signals are received one or two times daily and are registered on a chronograph. Wherever possible time readings up to one tenth of a second are given. Macro seismic data refer to Mercalli-Cancani-Sieberg scale / MCS /. Macro seismic rays are given in kilometers. Abbreviation DECM means: Determination was made by electronic computer.
