## SEISMOLOGICAL BULLETIN

January to March 1967

Vol. 14 No. 1

臺灣省氣象局

PUBLISHED QUARTERLY BY

TAIWAN PROVINCIAL WEATHER BUREAU

64, KUNG YUAN ROAD, TAIPEI TAIWAN, CHINA

### General Aspect of Earthquakes

From January to March, 1967.

The number of earthquakes which occurred during the period from January to March, 1967 is 235. Among them, there are 32 felt ones and 203 unfelt ones.

The remarkable earthquake which occurred on March 4th had a epicenter at 153 km. SE. of Hengchun and the focal depth was about 85 km. One of the two moderate earthquakes happened on January 29th at about 190 km. ENE. of Hwalien with a depth of 90 km while the other on February 23th at about 58 km. ENE. of Hwalien with a depth about 5 km. Those small felt area earthquakes accompanied by the local ones scattered almost along the east coast and its neighborhood

Besides those which happened in Taiwan Region, 103 distant earthquakes had been recorded by our seismometers. The data of the main earthquakes including distant ones are shown on the latter part of this bulletin.

Table I. Geographical coordinates of the Seismological Station, Taiwan China.

 $\lambda$ :Longitude  $\varphi$ :Geographical Latitude $\varphi'$ :Geocentric Latitude

$a = \cos\varphi' \cos\lambda$     $b = \cos\varphi' \sin\lambda$     $c = \sin\varphi'$

The present publication inserts the following explanation of the notations only in the first number hereafter.

## 1. Phase.

P: Normal first phase (Longitudinal waves)

pP, PP, PPP,.....: Longitudinal waves reflected at the earth's surface.

S: Normal second phase (transverse waves)

sS, SS, SSS,.....: Transverse waves reflected at the earth's surface.

PS, PPS,.....: Waves suffered a change or changes from longitudinal to transvers oscillation, on reflection at the earth's surface.

SP, SPP,.....: Waves suffered a change or changes from transverse to longitudinal oscillation, on reflection at the earth's surface.

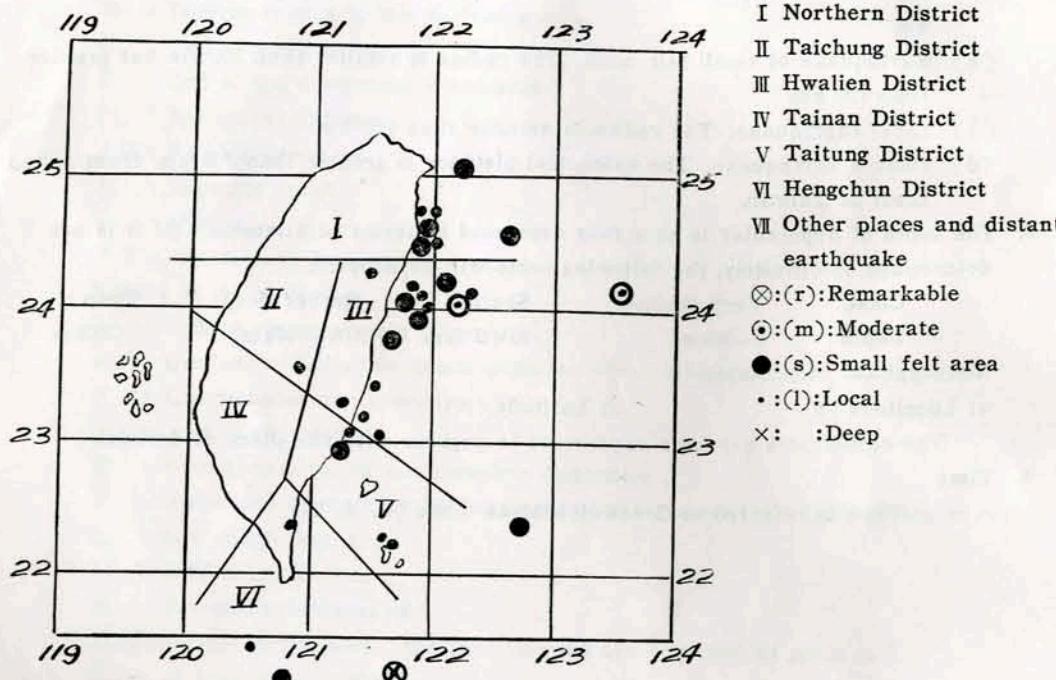

- L : Long waves at the beginning of the surface swaves.  
 Q : Shorter and more regular waves in the surface waves.  
 M : Largest motion in the surface waves.  
 C : Tail or end portion.  
 F : End of the discernible movement  
 $\Delta$  : Epicentral distance.  
 $\Delta H$  : Focal distance.  
 H : Depth of focus.  
 $\mu$  : Micron.  
 P-S : Duration of Preliminary tremor.  
 2. Nature of the motion.  
 i : Sudden commencement of a phase.  
 e : Gradual or indistinct commencement of a phase.  
 ? : Questionable or uncertain.  
 3. Period and Initial motion.  
 T : Period, duration of one complete oscillation.  
 I : Amplitude of the true displacement of the ground from the position at rest.  
 $I_N$  : N-S component of I.  
 $I_E$  : E-W component of I.  
 $I_Z$  : Vertical component of I.  
 Displacement to the north, east and upward are regarded as positive.  
 4. Scales of seismic intensity,  
 The intensity of the shock is estimated according to the scales O-VI, as follows:  
 O : No feeling: Shocks too weak to cause human feelings, registered only by seismographs.  
 I : Slight: Extremely feeble shocks only felt by persons at rest or by those who are observant to an earthquake.  
 II : Weak: Shocks felt by most persons, slight shaking of doors and latticed sidding doors.  
 III : Rather strong: Slight shaking of houses and buildings, rattling of doors and latticed sliding doors, swinging of hanging objects like the electric lamps, moving of liquids in vessels.  
 IV : Strong: Strong shaking of houses and buildings, overturning of unstable objects spilling of liquids out of vessels.  
 V : Very Strong: Cracks in the walls, overturning of gravestones, etc, lanterns etc, damaging of chimneys and mud and-plaster warehouses.  
 VI : Disastrous : Demolition of houses landslips, fissures on the roads, the ground etc.

	No Feeling	Slight	Weak	Rather Strong	Strong	Very Strong	Disastrous
Scale Acceleration (gal)	O $<-0.8$	I 0.8-2.5	II 2.5-8	III 8-25	IV 25-80	V 80-250	VI $250 <$

5. The magnitude of an earthquake is classified to the radius of the felt area assumed, roughly to be a circle as follows:-

- (r) Remarkable earthquake: The radius of the felt area is greater than 300 km.  
 (m) Moderate earthquake: The radius is smaller than 300 km. but greater than 200 km.  
 (s) Earthquake of small felt area: The radius is smaller than 200 km. but greater than 100 km.  
 (l) Local earthquake: The radius is smaller than 100 km.  
 (d) Distant earthquake: The epicentral distance is greater than 300 km. from the coast of Taiwan.  
 6. The depth of hypocenter is as a rule expressed in terms of kilometers, If it is not determined so definitely, the following scale will be adopted.
- |       |              |           |             |         |
|-------|--------------|-----------|-------------|---------|
| Class | Very shallow | Shallow   | Rather deep | Deep    |
| Depth | 0~30km.      | 30~100km. | 100~200km.  | >200km. |
7. Geographical coordinates:  
 $\lambda$ : Longitude (E)       $\varphi$ : Latitude (N)  
 The coordinates are been expressed in degrees with one place of decimal.
8. Time  
 Time is referred to Greenwich Mean Time (G. M. T.)

## Epicenters of Felt Earthquakes From January to March 1967

Number of earthquakes classified according to it's maghitude and districts January to March, 1967

Classification Districts	Number of felt earthquakes					Number of unfelt earthquakes	Total
	Magitudes Remark able	Moderate	Small felt area	Local	Total		
Northern District	—	—	4	3	7	50	57
Taichung "	—	—	—	1	1	9	10
Hwalian "	—	2	5	8	15	61	76
Tainan "	—	—	—	—	0	1	1
Taitung "	—	—	1	4	5	63	68
Hengchun "	1	—	1	2	4	19	23
Total	1	2	11	18	32	203	235
Other places	—	—	—	—	0	103	103

## The Felt Earthquakes Whick Occurred from January to March, 1967

No.	Month	P. (G. M. T.)	Magnitude	Epicenter	Latitude	Longitude	Depth
1	Jan.	d. h. m.	L	About 40 km. SSW. of Ilan			10
2	"	3 18 06	L	About 140 km. S. of Hengchun	20.8	120.7	40

## Major Earthquakes Which Occurred in [ ] March 1961

10 JUN 1968

Paul

A7H 69/12/17

# 地 震 季 報

第十四卷 第二號

中華民國五十六年四、五、六月

## SEISMOLOGICAL BULLETIN

April to June 1967

Vol. 14 No. 2

臺灣省氣象局

PUBLISHED QUARTERLY BY

TAIWAN PROVINCIAL WEATHER BUREAU

64, KUNG YUAN ROAD, TAIPEI TAIWAN, CHINA

## General Aspect of Earthquakes

From April to June, 1967

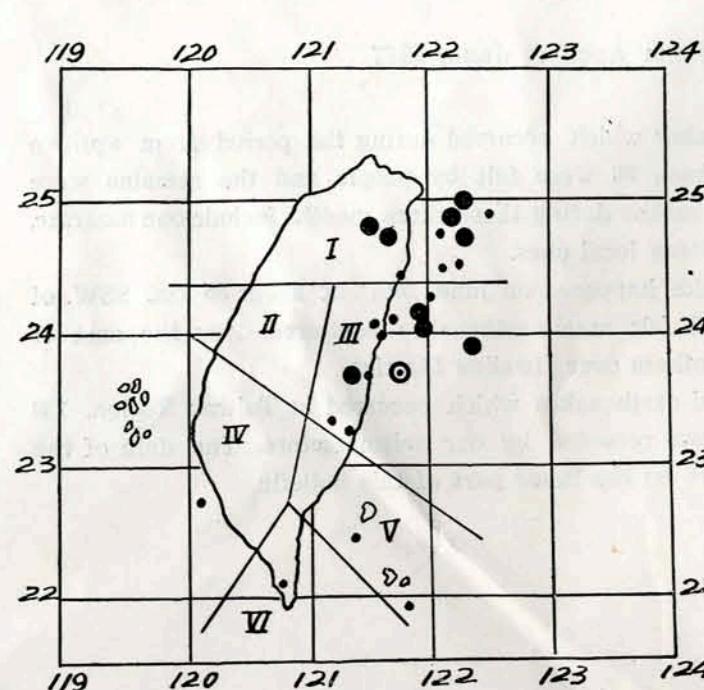

The number of earthquakes which occurred during the period from April to June, 1967 is 319. Among them, 26 were felt by people and the remains were unfelt ones. The felt earthquakes during these three months include one moderate, nine small felt area and sixteen local ones.

The moderate earthquake happened on June 10th at about 35 km. SSW. of Hualien. Five of the small felt area earthquakes scattered over the east of northern district while the others over Hualien District.

Besides above mentioned earthquakes which occurred in Taiwan Region, 133 distant earthquakes had been recorded by our seismometers. The data of the major earthquakes are shown on the latter part of this bulletin.

2

## Epicenters of Felt Earthquakes From April to June 1967

- I Northern District  
 II Taichung District  
 III Hwalien District  
 IV Tainan District  
 V Taitung District  
 VI Hengchun District  
 VII Other places and distant earthquake  
 ⊕:(r):Remarkable  
 ⊙:(m):Moderate  
 ●:(s):Small felt area  
 •:(l):Local  
 ×: :Deep

Number of earthquakes classified according to it's magnitude and districts April to June 1967

Classification Magitudes Districts	Number of felt earthquakes					Number of unfelt earthquakes	Total

## SEISMOLOGICAL BULLETIN

July to September 1967

Vol. 14 No. 3

臺灣省氣象局

PUBLISHED QUARTERLY BY

TAIWAN PROVINCIAL WEATHER BUREAU

64, KUNG YUAN ROAD, TAIPEI TAIWAN, CHINA

## General Aspect of Earthquakes

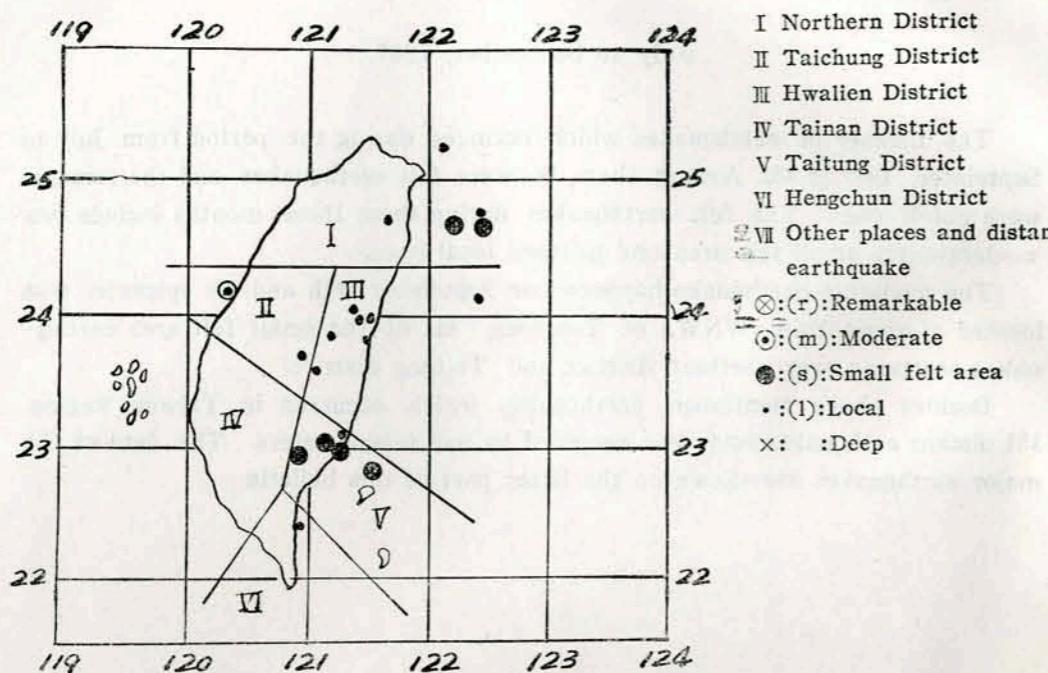

July to September, 1967.

The number of earthquakes which occurred during the period from July to September, 1967 is 431 Among them, 20 were felt earthquakes and the remains were unfelt ones. The felt earthquakes during these months include one moderate, six small felt area and thirteen local ones.

The moderate earthquake happened on September 28th and it's epicenter was located at about 22km. WNW. of Taichung. Six of the small felt area earthquakes scattered over northern district and Taitung district.

Besides above mentioned earthquakes which occurred in Taiwan Region, 151 distant eathquakes had been recorded by our seismometers. The data of the major earthquakes are shown on the latter part of this bulletin.

## Epicenters of Felt Earthquakes in July to September, 1967

Number of earthquakes classified according to it's magnitude and districts July to September 1967

Classification Maghitudes Districts	Number of felt earthquakes					Number of unfelt earthquakes	Total
